

Girl Scout Leaders!

Are you looking for an exciting place to take your Scouts?

Visit the International Women's Air & Space Museum!

IWASM's mission is to preserve the history of women in aviation and space by documenting their past, present, and future contributions. Our programs can help your scouts fulfill a number of **aerospace badge** requirements.

At the museum your scouts can:

- Complete a Discovery Hunt through the museum's exhibits, giving them an opportunity to learn about women pilots and astronauts.
 - Make and fly 3 different paper airplane designs.
- Explore hands-on exhibits like "Living & Working in Space" and a mission control console from Houston Space Center.
 - Receive a museum patch.

All of this takes place in the terminal building of Burke Lakefront Airport, home of the International Women's Air & Space Museum. Your visit includes a great view of the runway activity at the airport.

COST: \$4.50 per Girl Scout
